

COMPRESSED AIR FILTERS

AR - SERIES

Advanced die - casting technology and design ideas.

Exquisite appearance, bright color show new series products different.

New series elements made by imported fiber glasses with pleated way, which largely improve filtering area and effect.

New series design tighten and directionmarks, make users easily install and maintain products.

New series filter heads designed with inner elbow, let compressed air more gather and smoothly flow into elements.

4" aluminium alloy casting filter housings born which largely replace the uses of flange products and reduce the costs of purchase, transportations and maintenance.

Filter housings life time can reach 10 years through anti corrosion treatment under suggest working condition.

Treatment, According to different working conditions, elements life time can reach 7000 ~ 8000 hours.

FILTER ELEMENT GRADE

Filtration Grade F

Filter Type

Particle Removal / Water & Oil Aerosol

Replacement Cycle

: Main Line Filter

: 1 Micron

: 8000 Hrs

Filtration Grade B

Filter Type

Particle Removal / Water & Oil Aerosol

Replacement Cycle

: Oil Removal Filter

: 0.01 Micron

: 8000 Hrs

Filtration Grade A

Filter Type

Particle Removal / Water & Oil Aerosol

Replacement Cycle

: Micro Filter

: 0.001 Micron

: 8000 Hrs

Filtration Grade CA

Filter Type

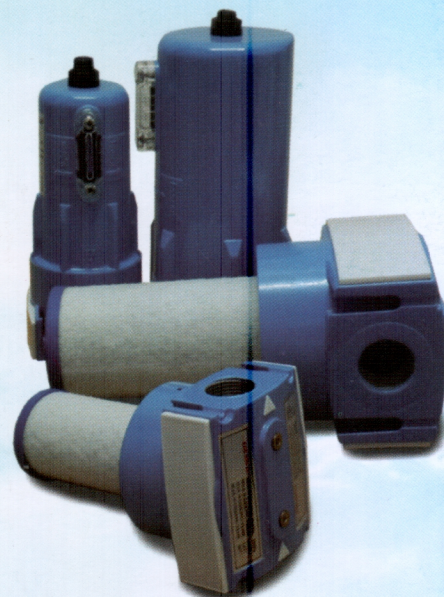

Particle Removal / Water & Oil Aerosol

Replacement Cycle

: Odour Removal Filter

: 0.003 Micron

: When oil vapour or odour is detected
